

**Benefits**

- Provides a diffused light effect
- Simple installation
- Ensures the flexible strip will not droop or sag over time
- Provides additional protection to the flexible strip

**Key Features**

- Ultra-slim profile
- Can be cut to size
- Living hinge technology for ease of installation
- Versatile profile that can be used in a multitude of different locations with various fixing points

**Product overview**

The Adapt profile is an integral part of the new Micro-Lines range of profiles which have been designed for flexible strips that are 5mm in width or below.

The profiles primary function is to sit in corners, which makes it perfect for installation under cabinets, shelves or inside larder units. However, alternative fixing options make the profile ideal for installation inside drawers as well.

The Adapt also features an innovative living hinge which means that the two parts of the profile stay attached when the flexible strip is installed, therefore making it much easier to clip the parts back together.

**Technical Specification**

Material	Profile - Polycarbonate
	Accessories - Polycarbonate
Flexible strip compatibility	3.5 – 5mm Wide strips

**Mechanical Specification**

Product Name	Dimensions (mm)	Weight (g)	IP Rating
Adapt	H11.5, W11.5, L1500	70	IP20
Adapt	H11.5, W11.5, L2500	114	IP20

**Order Codes**

Description	Order Code	Barcode
Adapt - 1.5 Meter Length	SE186790	5060522085720
Adapt - 2.5 Meter Length	SE186890	5060522085737

**Accessories**

Product Name	Order Code	Barcode	Notes
Mounting Brackets (set of 2)	SE997950	5060522085744	2 or 4 brackets supplied with the profile
Drawer Brackets (set of 2)	SE998950	5060522085751	Not supplied with the profile
End Caps (1 x left & 1 x right)	SE999950	5060522085768	2 or 4 supplied with the profile depending on the length
